

SOFTWARE AS A SERVICE

MTM SOFTWARE SUPPORT THROUGH RXCOMPANION™

SinfoniaRx offers our award-winning software platform, RxCompanion™, as a stand-alone software solution for health plans who are looking to enhance their in-house MTM programs with advanced technical support. Our award-winning system helps to streamline the delivery of clinical services in a highly efficient and effective manner, helping to maximize outcomes while minimizing program costs. The RxCompanion™ software can also be implemented as a hybrid option, utilizing the SinfoniaRx clinical providers and clients' in-house MTM providers, to coordinate care and support an efficient and effective MTM program

Secure Access to RxCompanion™

Your MTM providers will have reliable access to RxCompanion™ and all associated features through a secure remote desktop session host to fully support your MTM programs.

Customized Clinical Business Rules

SinfoníaRx will work with each plan to build a rule set that is customized for your specific patient population and program goals. Then, using our population management approach, will identify and triage patients with potential drug-related problems for outreach by your MTM providers.

Expert Clinical Pharmacy Support

SinfoníaRx has a team of clinical pharmacists that will help support program implementation, clinical business rule development and updates, call scripting, as well as patient and provider communication.

Integrated Patient and Provider Communications

RxCompanion™ includes customizable patient and provider communications integrated within the clinical business rules to minimize documentation and case completion time.

Supplemental MTM Provider Support

Should you have the need for additional MTM providers, SinfoníaRx contracted clinical pharmacy centers have expert MTM providers available to exceed all of your program needs.
