

Software as a Service

Award-winning software platform, RxCompanion™

Scalable Control through Expert Pharmacy Support

SinfoníaRx offers our award-winning software platform, RxCompanion™, as a stand-alone software solution for health plans who are looking to enhance their in-house MTM programs with advanced technical support. Our award-winning system helps to streamline the delivery of clinical services in a highly efficient and effective manner, helping to maximize outcomes while minimizing program costs.

The RxCompanion™ software can also be implemented as a hybrid option, utilizing the SinfoníaRx clinical providers and clients' in-house MTM providers, to coordinate care and support an efficient and effective MTM program.
